**Diagnosis
Therapeutics
Internal Medicine**

This course aims to enhance the knowledge and skills of clinicians on diagnosis and treatment of common medical conditions with an emphasis on therapeutics and long term follow up in the primary care setting.

It will utilize whole class lectures, interactive workshops, case based presentations and discussions; multimedia video; and practical clinical attachments; with English as the medium of instruction.

It will also provide a good opportunity for participants to interact with different specialists in internal medicine.

ADMISSION REQUIREMENT

The applicant must:-

- hold a primary medical degree, and
- have post-registration experience of not less than 12 months.

Applicants are expected to have access to the internet and an adequate command of English and computing skills.

COURSE STRUCTURE

- A 2-year part-time course with 12 modules of academic study taught consecutively.
- Each module comprises 12 hours of lecture and workshop, to be completed in one weekend (Saturday: 2:30pm to 7:00pm & Sunday: 9:00am to 6:30pm).
- Each module also includes 2 hours of clinical attachment at the Queen Mary Hospital or other affiliated sites, usually conducted on a weekday, depending on the activities of the Divisions.

COURSE FEE

- Whole course: HKD23,000, payable on an annual basis in two equal instalments (subject to approval)
- Occasional students: HKD2,500 per module

VENUE

William M.W. Mong Block
Faculty of Medicine Building
Sassoon Road, Pok Fu Lam, HK
